WEAVE A STORY (CLASS VI)
Hi, my name is Sitara the White Tiger. I live in West Bengal. Today I will tell you about my adventures around India and some of its neighboring countries. I was not born in a sanctuary but was brought here and now it is my home.

So, the adventure started when I was 12 tiger years (not man years) old.

I was lying beside my mom, well not exactly beside but really close to her. I was cozy when suddenly some sounds from far away started coming. My mom got alert. And the sounds were getting louder and louder. The sounds were such as if a huge group of elephants were coming or a large group of lions were coming. After a while, we saw many jeeps coming towards us with men holding guns, in great speed. We saw that the jeeps had a name of a company that probably was a clothing company. The men wore clothes made of leather. Seeing the jeeps, my mom started running and told me to run. We ran at full speed but the jeeps started coming very close to us. The men started to shoot with their guns. Some of them got to me but many were shot on my mom. Then a sharp bullet was shot towards me. And my mom jumped and got the bullet on her leg collapsed and I was just going to stop and save her but just then she too.

So, I ran and ran then took a narrow passage a

The next morning, I woke up to the sound of the gun shots felt as if I were back in my home forest with the wildlife. I believe that I was really free again and could live just like my original home. In a few days I was living my normal life again.

Why all this happened? It happened because humans and poachers have started thinking they are the kings of nature and kill animals on their wish. They want to make their clothes and leather items for which they do not think twice to kill animals. Animals must run for their lives. People are just making dams and cutting forests which gets animals injured. But we need help of many people to prevent this. Fortunately, there are some people who build places like sanctuaries and save animals like me. Many animals have become endangered like the white tigers and Bengal tigers and many have become extinct. Life of all animals who face this, whether they are Bengal tigers or deer, their stories are similar to mine. We all need protection.

WORDS WORLD
(CLASS VII)
Animal Cruelty

The world is full of them
By Showing cruelty we should condemn
All are different in some way or the other
We don’t spare even the mother!

We often go in several buses
To enjoy seeing them playing tricks in circuses
We don’t know how they feel in zoos We don’t know how they are misused

They are often beaten with a hunter
For they are just a fun instructor
We fear animals just because of their roar
What they feel is just what we ignore!

Why is there so much assassination?
Animals feel so much frustration

Poaching has been banned
We all shall stand and make them understand

Herds and herds of elephants get killed
Which make all other animals stilled Animal Cruelty shall be stopped immediately Every human should follow this obediently

Wildlife sanctuaries are their best protection
Zoo and circus should be everybody’s objection
We all should have an inspection
For the current situation.

THIRD POSITION: Anish Goyal VII A
Animal Cruelty

"Animal rights are not a gift we give animals, it is a birthright we have taken from them."

- Ryan Phillips

Animal cruelty is any act that causes harm or suffering to any animal by humans. It is also known as animal abuse or animal neglect. Whatever we may call it, it is unquestionably one of the most heartless and insensitive acts. Human beings often forget that the world does not belong to us, we belong to it, and as world citizens, we have to share it with the other living beings who have just as much claim to live here as we do.

Cases of animal cruelty are everywhere. Many accessories are made of reptile skins and clothes of animal fur. Elephants and rhinos are hunted for their tusks and horns. Poaching or illegal capturing of animals is another major problem. Some people even hunt for fun or as a sport. Like Sudan, the last northern male white rhino who died in 2018, resulting in at the end of a majestic species that stretched back millions of years, a species that had been the victim of brutal hunting by humans for their horns. Other animals like rabbits and pigs are used for experiments in laboratories. Using domestic animals for intensive labour without proper food and treatment is also animal cruelty. None of these ruthless actions can be justified.

Cases of animal cruelty are everywhere. Many accessories are made of reptile skins and clothes of animal fur. Elephants and rhinos are hunted for their tusks and horns. Poaching or illegal capturing of animals is another major problem. Some people even hunt for fun or as a sport. Like Sudan, the last northern male white rhino who died in 2018, resulting in at the end of a majestic species that stretched back millions of years, a species that had been the victim of brutal hunting by humans for their horns. Other animals like rabbits and pigs are used for experiments in laboratories. Using domestic animals for intensive labour without proper food and treatment is also animal cruelty. None of these ruthless actions can be justified.

According to statistics, around 130 billion animals are slaughtered every year only to fulfill human requirements. This number is disgraceful and this needs to stop. Animal lives matter not just to prevent extinction and instability in the food chain, but simply because they are lives. Animals like us are individuals and have every right to live a safe life. Just because they can't express their pain and grief does not mean it's not there. We all need to come together and become their voice. Many Scandinavian countries and other countries like Germany, New Zealand, and Austria have introduced strict animal welfare laws and we all need to do our small part. We need to create a world where all living beings can live freely and with respect, not just human beings because cruelty towards innocent animals is the most inhuman thing a human can do.
Animal Cruelty (by Samarth Gupta 7G)

Animals are true and pure,
They live like one should,
Let’s give them the treatment they deserve,
Which is always kind and good.

Let’s not destroy their habitat,
Let’s not topsy turvy their life,
They have an equal right to happiness,
Don’t you think that’s right?

Animals are getting extinct,
Very fast in our present lives,
Their extinction is because of us,
We are the culprits for this crime!

Killing elephants for their tusks,
Killing sharks for their fins,
Killing snakes for their skin,
How selfish and cruel have we been!

Caging the animals in the zoo
For entertaining our children through and through,
Training animals in the circus
Where they are spanked and tortured,
Do you think this is a life
Which the animals should be offered?

How will humans feel
If they are caged and tortured,
Living a life full of horror
The reason being the painful exertion,
Of not knowing when your life ends
With a ruthless butcher standing at the other end.

Animals are to be loved,
To be cuddled and hugged,
They are full of unconditional love,
Which they shower on us.

Animals should be free in the open
Living a life of their free will.
