

Dear Parents,

*Gift your child a future with books.....*

*Children fall in love with reading in a unique manner. Cuddling with a parent over a book or gathering around the teacher for story time helps them associate reading with nurturing. "These reading experiences set the stage for later reading success,".....*

*As busy parents we have resorted to electronic gadgets to keep our children engaged and not to interrupt us in our busy schedules. The constant movement, flashing lights and noise which bombard their senses when they watching TV, looking at a computer or playing an electronic game are actually quite stressful to a kids mind.*

BUILD  
READING  
HABIT IN  
CHILDREN-

*As a parent we have a role to play too. It's important that we regulate, moderately and get them to a world of imagination & exploration through a well curated world of content for kids.*

*Spending a few minutes each day sharing a story with your child will not only increase your child's language comprehension and vocabulary, but will also relax their body, calm the mind and will build up their emotional intelligence. A quality that is very important to survive in today's stressful world.*

READING  
WITH YOUR  
CHILD AT  
HOME

*Evidence shows that children who read out loud daily at home for 15 minutes make huge improvements in their reading ability. Reading is already a major part of daily activities in our school but children who receive extra individual attention at home do make much more progress...*

Benefit:

- Expanded vocabulary and writing skills
- Healthy social and emotional development
- Longer attention spans, promoting better retention of information in school
- Enhanced imaginative and critical thinking skills
- Enhanced memory and higher levels of concentration

*So, invite your child to select books to read. We appreciate your support as we work together to give your child the best of opportunities.....*
