

Delhi Public School Mathura Road

Class Pre-Primary (2021-22)

Summer Vacation Activities

Dear parent,

Each day gone by in the month of April was dedicated towards making the children of the Pre-Primary Wing comfortable and at ease in their new environment. Making new friends, loving their teachers, enjoying the daily curriculum and learning while doing, surely makes online classes special for them. Our main aim is to offer a plethora of opportunities to the little ones - helping them explore their personal skills, talents and developing their curiosity while they are involved in multifarious activities. The main aim of the activities revolving around 'Earth Day' was to sensitise the children to their responsibility towards the Earth, learning to do their 'bit' to preserve nature.

Growing plants add years to life and life to your years. This pandemic has made us realise the real cost of oxygen so let us unite and support [#Indianitesgogreen](#) and plant saplings.

Good health is true wealth

"Health is the condition of wisdom, and the sign is cheerfulness- an open and noble temper."

Here are some suggestions to keep the tiny tots fit and healthy:

- Keep the children hydrated with different kinds of fluids for e.g. water, lemonade, juice, shakes etc.
- Offer a variety of food options to kids so that they develop their taste. You do not need to force them to eat but can offer them a few bites to start with.
- Develop the clean plate rule by instructing them not to waste food served on

one's plate.

- Avoid sweets as a way to show your affection. It can lead them to munch every time. Instead, you should shower them with praise on a regular basis.
- Engage children in a total of 20 minutes of physical activity every day.
- Discourage eating snacks while watching T.V. or playing video games.
- Habituate your child to go to bed early and rise early.

Let us practice Yoga

Children of all ages need opportunities to 'unplug' and relax. A short-guided meditation is an invaluable tool in calming even young children so that the boundless energy stored up in them can be directed usefully!

English and EVS

Teaching and learning go hand in hand. To make learning effective we try and integrate different subjects so that it is fun for our little ones.

In order to integrate EVS, English and the Arts, children will take up different rooms in the house. They will draw pictures of any two items from each room, count the number of that particular item and write the sound/ letter it starts with. For example: in the bedroom if they choose pillow, they will draw and colour / paste any picture (magazines or books). They will then write the number of pillows in the bedroom and write 'P' for pillow. Likewise, they will count and draw any two items from each room in the house.

GRATITUDE IS THE BEST ATTITUDE

In order to inculcate the habit of showing gratitude and being thankful for all the small and big blessings we receive; children will make a small booklet in which they will draw or paste pictures of different things or people they are thankful for. They will make an entry in the booklet every week. They will show their booklet to their friends and teacher and talk about it in the home room period once the school reopens.

MORE ABOUT OUR ANIMAL FRIENDS

We want our children to be more aware about their surroundings including the beautiful fauna (animal world) we are blessed with. To achieve that, children will make a mask or puppet (using material available at home) and learn some interesting facts about that animal. Their knowledge bank will increase tremendously when they get back to class and share the information they have gathered with their friends.

LET'S KNOW OUR FAMILY BETTER

In the given situation where we cannot and should not move out, let's make the most of this time. Let's try and find out some lesser-known facts about our parents and grandparents. Children can interview their parents/ grandparents and find out about their childhood.

Some questions that can be asked are:

- Favourite food
- Hobby

- Name of their school
- Name of their college
- Childhood friends
- Games they played etc.

Children can record this information in the form of a video where they interview their parents and grandparents. They can also present it on an A4 sheet where they can draw or paste the information gathered.

MATHS

"The only way to learn mathematics is to do mathematics"

The children will enjoy multifarious activities while doing them.

PRODUCING A MASTERPIECE

Roll the dice 6 times.

Note down the observations in a tabular form.

Read the instructions and do as instructed:

- Write what comes after the 1st observation and draw as many flowers.
E.g.: The no. you get after rolling the dice is 2, 3 comes after 2.
Draw 3 flowers.
- Draw as many trees as you get in the 2nd observation.

c) Draw as many butterflies as your 3rd observation.

d) Draw as many children playing as per your 4th observation.

e) Draw as many clouds as per your 5th observation.

f) Draw a sun and as many rays as your 6th observation.

Now, colour the masterpiece you have drawn.

Do it on an A4 sheet and share your masterpiece with your teacher after the vacation.

FUN TIME WITH FAMILY

Schools closed and staying home could be stressful but it has brought families closer than before. To make this time fruitful, play a board game with your family members, click the pictures and send them to your teacher.

PLANT A NUMBER LINE

Number recognition skills build upon the initially developed number sense. These skills are a strong support in supplementing the learning of arithmetic concepts. In order to develop the number concepts, children will plant a number line using chart paper, aluminium foil roll, A4 sheet and ice cream sticks.

HINDI

DHOOM DHADAKA

Parents will collect various items from home like scissors, comb, letter, fruits, paper, keys, vegetables, flag, etc. in a pinata bag. Music will be played and the kids will groove to the music. As soon as the music stops, parents will turn the bag upside down. The parents will show the flashcard of different vyanjans (one by one) out of the vyanjan given below from क से ण. Kids will only pick up things beginning with the same vyanjan as shown by the parents.

क-वर्ग - क, ख, ग, घ, ङ।

च-वर्ग - च, छ, ज, झ, ञ।

ट-वर्ग - ट, ठ, ड, ढ, ण।

*Let's have some more fun

Let us Play Hopscotch (Indoors)

KALIEDOSCOPE

Material Required

- Empty toilet paper roll
- Cardboard
- Silver tape and cello tape
- Scissors
- A4 size Ivory/ pastel/ cartridge sheet
- Bendy straw
- Markers, stickers, or other material for decorating your spinning circle

Steps:

1. Cut three equal sized rectangular strips from the cardboard and cover them with silver tape on both sides.
2. Arrange the strips to form a triangle that should fit inside the empty toilet roll.
3. Cut off the bendy end of a flexible straw.
4. Tape it along the top of your tube with the flexible part of the straw hanging over the edge.
5. Cut out 3 circles from the Ivory sheet (3.75 inches in diameter).
6. Poke a hole in the center of your circle using a sharp pencil.
7. Children to decorate the circle using markers, stickers, crayons etc. You may try out different designs and shapes.

8. Place the circle onto your straw with the design facing the kaleidoscope. Ensure that the hole fits over the flexible portion of the straw, so that it turns easily.
9. Look into your kaleidoscope and explore all the reflections created by your design!

Wishing you and your family a safe and relaxing vacation!

****Please find attached below vyanjan geet (varnmala) and formation of Hindi vyanjan (क से ज), just for your reference.**

गमः

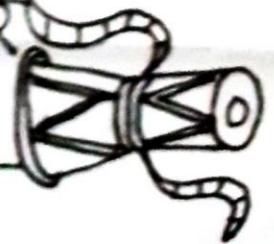

क से कबूतर देख रहा है
